

# Glasswing Readiness Assessment

Mitigating the risks of Anthropic's Mythos Model through AI-driven, continuous security validation

Anthropic's Mythos marks a genuine inflection point in the threat landscape. Attackers are changing how they operate. What used to take weeks of manual effort can now be exploited in hours—across a much larger attack surface. Anthropic's Project Glasswing decision shows what this looks like in practice: AI exploring attack paths at a speed and scale traditional testing can't match. The takeaway is simple: defensive models built around periodic, human-led testing are falling behind.

## Synack's Solution

Synack's solution is to implement a strategy that eliminates risk from decisions of the past and tightens up processes to remove new risk introduction. Synack is offering a complimentary point-in-time assessment to show what your attack surface looks like to an AI agent and what vulnerabilities can already be discovered.

## Synack Glasswing Readiness Assessment Process

<b>Phase 1: Discovery</b>	<b>Phase 2: Sara AI Pentest</b>	<b>Phase 3: Full Coverage</b>
<p><b>Map your external attack surface to get an attacker's view</b></p> <ul style="list-style-type: none"><li>• Enumerate all IPs &amp; FQDNs</li><li>• Identify exposed web apps</li><li>• See risks without active scanning</li><li>• Asset Prioritization</li></ul>	<p><b>See what vulnerabilities Synack's agentic AI can discover</b></p> <ul style="list-style-type: none"><li>• Sara AI Pentest</li><li>• Get a report with all exploitable vulnerabilities within 3 days</li><li>• Test 1 small web app OR 100 IPs</li></ul>	<p><b>Scale AI-led testing across your whole attack surface</b></p> <ul style="list-style-type: none"><li>• Full-scale attack surface coverage</li><li>• Continuous monitoring</li><li>• Remediation roadmap</li><li>• Cost: Custom based on number of assets in scope and testing frequency</li></ul>

**Terms & Conditions of the Glasswing Readiness Assessment Complimentary Offer:** This offer is available only to qualifying commercial or government organizations, as determined by Synack in its sole discretion. Each eligible organization may receive one (1) complimentary Attack Surface Discovery scan and one (1) complimentary Sara Pentest on a small web app or up to 100 IPs. Any website or IP submitted for testing must be approved by Synack, and such approval may be withheld at Synack's sole discretion. Each engagement will be subject to Synack's standard terms and conditions available at <https://www.synack.com/master-service-agreement/>. Synack reserves the right to modify, suspend or terminate this offer at any time. This offer expires on May 15, 2026.
